## **X Developer Application**

If you are setting up an X (formerly Twitter) application for the first time, you must apply for a developer account in order to make use of the or integrations that SupportPro has.

Visit the X developer site

- you will need to

login to your X account if not already logged in.

Start the process by pressing the "Apply for a developer account" button.

Select the 'Build customized solutions in-house' option as your primary reason for using X developer tools and click 'Next'.

Confirm your personal details. Keep it set to a team developer account unless you are are not using the software for an organisation. Click 'Next' to continue. Enter information about your organisation, and then click 'Next' to continue. This step may not be required if you are applying for an individual developer account.

Please fill in the sections as shown. The following is a template response, but you may need to adjust it based on your own requirements.

We have installed the SupportPro (https://www.suppor tpro.com) software and would like to use its X integ ration.The SupportPro software uses a periodic cron task to fetch X mentions and direct messages from us ers to our X account. These communications create a ticket in the software only visible to authenticated operators, and the operators can then reply to the ticket and it posts a tweet or direct message back t o the user. Documentation for this integration can b e found at the link below.https://docs.supportpro.co m/current/Twitter+ChannelThe software also provides an authentication option for X, so users can registe r/login with their X accounts in the software. Docum entation for this integration can be found at the li nk below.https://docs.supportpro.com/current/Third+P arty+Integrations+Twitter

## No

## Yes

The SupportPro software uses a periodic cron task to fetch X mentions and direct messages from users to our X account. These communications create a ticket in the software only visible to authenticated operat ors, and the operators can then reply to the ticket and it posts a tweet or direct message back to the u ser. Documentation for this integration can be found at the link below.https://docs.supportpro.com/curre nt/Twitter+Channel

No

Please read through everything and ensure all the data has been entered correctly, then click 'Looks good!'.

Finally accept the developer agreement and click "Submit Application".

You will now see the below screen. Make sure to confirm your email address by clicking the link in the email they send. You then may need to wait for X to approve the application before creating your first application. Online URL: <u>https://docs.supportpro.vn/article/x-developer-application-293.html</u>
